FlagTag Labels

Large, easy-to-read wire identification

MADE FOR REAL

Labels for Thermal Transfer Printers

FlagTag Labels

The HellermannTyton FlagTag is an innovative flag-style solution for labeling various conductor sizes. Print from any compatible HellermannTyton thermal transfer printer. Applications include high-density cable groups, where it's not possible to move the wires to view critical identifiers. FlagTags also allow for the printing of barcodes, graphics and multiple lines of text without losing direct visibility of the printed data. Whether the application is in data centers, wire harness assemblies or in hard-to-reach areas, FlagTags are an ideal option for organizing and marking wire and cable or even bundles of cables when required.

Features and Benefits

- Leaves no exposed adhesive, so it won't adhere to adjacent labels.

- Notched score line for error-free, single-finger folding.

- After installation, information can be read from both sides of the marker, making it easy to identify specific cables.

- Locking tail permanently bonds the label to the cable.

- Available in thermal transfer or laser printable formats for expanded printing options.

MATERIAL	Polyester (PET)
Adhesive	Acrylic
Operating Temperature	-40°F to +302°F (-40°C to +150°C)

RoHS✓

PART NO.	TYPE	Height (H) in. (mm)	Height (H2) in. (mm)	Height (H3) in. (mm)	Width (W1) in. (mm)	Width (W2) in. (mm)	Color	Qty. per Roll
596-97003	FTTT	1.75 (44.5)	2.25 (57.15)	4.00 (101.60)	1.00 (25.4)	0.25 (6.35)	White gloss	2400

Dimensions are approximate and subject to technical changes. Use Part No. for ordering and Type for specification purposes.

FlagTag Installation Instructions

1 Place adhesive side of label against wire with only the tail touching the wire.

2 Fold tail over the wire and attach to the exposed adhesive of the bottom label panel.

3 Fold top panel along perforation over the tail and seal the two panels together.
Labels for Laser Printers
